## **Recommending Mr. Mehdi Borjkhani for a research position**

### **To Whom It May Concern**

I am pleased to write this recommendation letter for Mr. Mehdi Borjkhani. I am writing this letter in strong support of him.

He graduated from the University of Tehran (the best-ranked university in Iran). I believe he is a mature, skillful, independent, and self-motivated scientist. He has a hardworking personality, and I am sure that he can finish any scientific research in the best possible way. I know he has devoted his life to science, and I am sure he will be one of the future leading scientists in his field. He has excellent talent for mathematics, biophysics, and programming. These skills, along with his hard work, can make him a successful researcher in computational neuroscience.

He has some excellent published research in neuroscience, both in computational modeling and signal processing. Furthermore, I have seen some of his unpublished research related to the classification of EEG signals using convolutional neural networks. His excellent capabilities in modeling biological systems and biological signal processing are well-known by researchers.

I know he wants to pursue an academic career and establish his own research lab at a top-notch university in neuroscience. He is interested in both theoretical and experimental works. Comparing Mehdi with others, I evaluated his overall ability in the top 1%. I am confident that he will have no problem continuing his studies in any program. I highly recommend him to pursue his career at your university.

If you need any further information, please contact me.

Sincerely Yours,  
Hadi Borj Khani  
Scientific assistant  
Hochschule für Technik und Wirtschaft (HTW) Berlin
